

## Ants (Hymenoptera: Formicidae) of Cold Canyon

Philip S. Ward

Entomology Department  
University of California  
Davis, CA 95616

This list is based on Phil Ward's observations over an 18-year period at Stebbins Cold Canyon Reserve, 19km NNW Vacaville, Solano County, California (38°30'N, 122°06'W). It includes ant collections made throughout the Cold Canyon watershed, not just those within the Reserve boundaries. All of the 39 ant species observed in Cold Canyon are native species, and they are typical of "lower Sonoran" (oak woodland and chaparral) habitats. Ant species not yet recorded from Cold Canyon, but found nearby in the Vaca Mountains or along Putah Creek, include *Lasius alienus*, *Formica aerata*, *Formica subpolita*, *Camponotus* sp. nr. *vicus*, *Polyergus breviceps*, *Cardiocondyla ectopia* (introduced species) and *Linepithema humile* (introduced species). Voucher specimens of all species listed are deposited in the Bohart Museum of Entomology (UCDC) and a partial set in the Museum of Comparative Zoology, Harvard University (MCZC).

Cold Canyon was arbitrarily divided into six separate sampling sites. The table below describes these sites, as well as the number of species found in each site.

Site	Site Description	Width	Number of spp.	Number of spp. only in this site
Site A	Mouth of canyon, between Hwy. 128 and Putah Creek	~120m	22	1
Site B	Canyon proper, Hwy. 128 to old homestead	~120m	31	3
Site C	Ridge west of Cold Canyon proper (Blue Ridge)	~420m	20	0
Site D	Ridge east of Cold Canyon proper (Pleasant Ridge)	~360m	19	1
Site E	Upper canyon, south of the old homestead	~300m	23	0
Site F	Upper watershed ridge (extreme south end)	~600m	25	1

The 39 ant species are categorized by site, by nesting habit (A=arboreal, G=ground), and by feeding habit (O=omnivore/scavenger, P=predator, S=seed-harvester), in the table below.

Subfamily, species	Site(s)	Nesting Habits	Feeding Habits
<hr/>			
<b>Dolichoderinae</b>			
<i>Dorymyrmex bicolor</i>	B	G	O
<i>Dorymyrmex insanus</i>	A, B, C	G	O
<i>Liometopum luctuosum</i>	A, B, D	A	O
<i>Liometopum occidentale</i>	A, B, D, E	A	O
<i>Tapinoma sessile</i>	A, B, C, F	G	O
<b>Ecitoninae</b>			
<i>Neivamyrmexnigrescens</i>	B, C, D, E, F	G	P
<b>Formicinae</b>			
<i>Brachymyrmex depilis</i>	B, D	G	O
<i>Camponotus essigi</i>	A, B, C, D, E, F	A	O
<i>Camponotus hyatti</i>	C, E, F	G	O
<i>Camponotus quercicola</i>	B, E	A	O
<i>Camponotus semitestaceus</i>	A, B, C, D, E, F	G	O
<i>Camponotus yogi</i>	B, D, F	A/G	O
<i>Formica moki</i>	A, B, C, D, E, F	G	O
<i>Prenolepis imparis</i>	A, B, C, D, E, F	G	O
<b>Myrmicinae</b>			
<i>Crematogastercoarctata</i>	B, C, D, E, F	G	O
<i>Crematogasterhespera</i>	A	A	O
<i>Crematogastermarionii</i>	E, F	A	O

<i>Cyphomyrmex wheeleri</i>	B, D	G	O
<i>Leptothorax andrei</i>	A, B, C, D, E, F	G	O
<i>Leptothorax sp. cf. andrei</i>	F	G	?
<i>Leptothorax gallae</i>	A, C, E, F	A	O
<i>Leptothorax nevadensis</i>	B, C, D, E, F	G	O
<i>Leptothorax nitens</i>	C, E, F	G	O
<i>Messor andrei</i>	B, C, D, E, F	G	S (O)
<i>Monomorium ergatogyna</i>	A, F	G	O
<i>Myrmecina americana</i>	A, B, C, D	G	P
<i>Pheidole californica</i>	A, B, F	G	S (O)
<i>Pogonomyrmex subdentatus</i>	B	G	S (O)
<i>Solenopsis molesta</i> (s.l.)	A, B, C, D, E, F	G	O
<i>Solenopsis tennesseensis</i>	B	G	O
<i>Solenopsis xyloni</i>	A, B, C, D, E, F	G	S (O)
<i>Stenamma californicum</i>	A, B	G	O
<i>Stenamma diecki</i>	A, B, C, D, E, F	G	O
<i>Stenamma punctatoventre</i>	A, B, E, F	G	O
<b>Ponerinae</b>			
<i>Amblyopone pallipes</i>	B, E, F	G	P
<i>Hypoponera sp. cf. inexorata</i>	A, B, C, E, F	G	P
<i>Hypoponera opacior</i>	A, B, E	G	P
<i>Proceratium californicum</i>	D	G	P
<b>Pseudomyrmecinae</b>			
<i>Pseudomyrmex apache</i>	A, B, C, E, F	A	O
